SERVICE NOTE

**Subject: AUTHORIZATION TO CARRY OUT HEALTH AND SOCIAL CARE ACTIVITIES IN
THE TUBAH HEALTH DISTRICT**

I, Dr Fambombi Vitalis Fete, the District Medical Officer of Tubah Health District, after reviewing the application file submitted by the representative of Value Health Africa (VAHA), a non-governmental organization operating in Cameroon, and in concordance with regulations put in place by the competent authorities, do hereby authorize VAHA to carryout health and social care activities as stipulated by the memorandum of understanding between the Tubah District Health Service and VAHA.

This service note is meant to serve the purpose for which it is intended.

Subject: RECOMMENDATION FOR A GRANT APPLICATION

Value Health Africa (VAHA) is a reputable non-profit organization with a traceable excellent record of accomplishment in improving health and livelihood in the North West region. They went operational in 2015 and have since then supported over 20 health districts in the North West Region with Tubah Health District being one the beneficiaries. VAHA began working with Tubah since 2016 were they supported community engagement programs around Diabetes and HIV awareness initiatives.

Just recently, VAHA worked with the Tubah health district to build capacity for over 60 community health workers to support the response against the COVID-19 pandemic. The district also benefited from hand washing stations, masks and other Infection prevention control supplies. During my work with VAHA, I could deduce that, they have a well-structured and systematic institutional workflow mechanism in place and their financial management was very transparent. VAHA has a sound understanding of the administrative procedure in the Tubah health district and a good mastery of the socio-political issues in the terrain. All our activities with VAHA went hitch free because of the professional, knowledgeable and impactful service they rendered to the community.

I will highly recommend Value Health Africa and their team for any humanitarian project due to their competence during our time of work and the relationship VAHA has built with the Tubah Health district.

Sincerely,

THE DISTRICT MEDICAL OFFICER.
TUBAH HEALTH DISTRICT
