

SAFE HAND-STOP COVID 19 CONCEPT NOTE

Background:

Due to the Corona Virus pandemic, nations and communities have been plunged into states of health emergency. Since March 6th 2020, Cameroon has been reporting several cases of COVID 19 with the incidence curve going steadily upwards as the days go by. With confirmed cases in the West Region, neighboring region to North West, there is a risk of interregional COVID-19 spread as people keep circulation. Therefore, there is a need to take prompt actions to enhance all preventive measures to stop the local transmission and spread of COVID19.

Aim

✓ To promote effective hand hygiene amongst people in the Bamenda community, and

Need identification

Public places especially parks and market places lack access to a running tap where people can wash their hands and these places are the most busiest places in the Bamenda community. In order to stop the spread of COVID19, these areas have to have access to hand washing facilities.

Activity to be carried (How to achieve our aim)

- Production of 10 water dispensers
- Installation of water dispensers at the entrance to Amour Mezam Park, Mondial VIP Park, Vatican Park, Nso Boyz Park, Main Market, Food Market, VAHA office,
- Demonstration of proper hand washing

Personels

Promoting good health & wellbeing for all

- Vaha team
- Representatives from the municipal council
- Representatives from the regional delegation
- Representatives from the Dos office

Impact

- An average of 200000 persons will have access to hand washing facility on a daily basis
- Prevent the spread of COVID 19

Sustainability

Council workers will ensure that the items are safe and water is continually refilled.

Management of the areas where the hand wishing points are installed would ensure there are volunteers take care of the items.

Budget

item	quantity	Unit price	Total price
80 litres bucket	10	6000	60000
Tap heads	10	2000	20000
Fitting of tap heads to bucket	10	2500	25000
